

CLEAR *the* AIR SPOKANE

A Message from the Spokane County Air Pollution Control Authority

NON-BURNING DISPOSAL ALTERNATIVES FOR NATURAL VEGETATION

WHY NOT BURN?

Burning natural vegetation emits harmful smoke particles and chemicals. Inhaling these particles can damage the lungs, affecting respiratory and cardiovascular function. This is why burning natural yard and garden debris is only allowed in outlying areas of Spokane County. All of Spokane County's 13 incorporated cities, towns and their urban growth areas are "no burn" for yard and garden debris burning. For those who are eligible to burn, the Spokane County Air Pollution Control Authority (SCAPCA)

administers an 8-day burn season in April of each year. For eligibility rules, dates and other information, please contact SCAPCA at 477-4727 or online at www.scapca.org/outdoor_burning.asp.

WHAT ARE MY OPTIONS?

There are healthier, safer options available to handle natural vegetation, including drop-off locations, and in some areas, curbside pick up. To assist you, SCAPCA has compiled this list of resources. Also, refer to the business listings in the phone book, for additional companies/services. Thank you for using non-burning options to handle your natural vegetation --doing so improves air quality.

HAULING & DISPOSAL SERVICES FOR
