

**“Doing Our Share for Clean Air”**  
**Business Recognition Program – Registration Form**

By complying with air quality requirements, businesses are helping reduce air pollution, which benefits everyone in our community. The Spokane Regional Clean Air Agency (Spokane Clean Air) wants to acknowledge businesses that are meeting local air quality requirements and choosing to go beyond compliance to further reduce air emissions. To recognize these efforts, Spokane Clean Air has expanded its current business recognition program from one to two levels: Level One - Silver, and Level Two - Gold.

Please take a moment and complete the form below, detach and mail back with your Annual Registration Form. Businesses that meet the criteria, will receive special recognition; including but not limited to:

- Silver – “Doing Our Share for Clean Air” static cling window decal to display at your business, recognition in *Update* newsletter
- Gold –Silver level recognition, certificate, print ad listing qualifying businesses, recognition in *Update* newsletter and agency website

This is our way of recognizing your contribution to cleaner air in Spokane. If you have any questions or comments, please contact Margee Chambers at 477-4727, extension # 114. Thank you!

To receive recognition, your business must meet the following criteria below. Check the box if you’ve met the criteria:

**Level One - Silver:**

- My facility has not been issued a Notice of Violation by Spokane Clean Air at any time during the past three years (2006-present).
- My Annual Registration Form is complete and submitted to Spokane Clean Air by the required due date.
- My Annual Registration Fees are paid to Spokane Clean Air by the required due date.

**Level Two - Gold:**

- Must qualify for level one.
- Implement clean air practices in three out of five pollution prevention categories listed below. For a detailed list of pollution prevention practices, visit [www.spokanecleanair.org/business\\_recognition.asp](http://www.spokanecleanair.org/business_recognition.asp).
  - Energy Efficiency – lighting, heating, cooling, water heating, equipment, combustion efficiency
  - Process changes, source reduction, material substitution
  - Sector Specific – back-up generators, boilers, dry cleaners, gas stations, printers, surface coaters
  - Transportation – commute trip reduction, no idle policies, cleaner fleet vehicles
  - Participated in a Spokane Clean Air Pollution Prevention consultation
- Please describe pollution prevention practices implemented at your business within the last three years on the attached sheet.
